EXPLANATORY NOTES

Introduction

This publication is issued each month as a supplement to the annual *Catalogue of Publications, Australia* (1101.0) of the Australian Bureau of Statistics, which lists current ABS publications and gives brief descriptions (abstracts) of their contents. In addition, a *Publications Advice* (1105.0) is issued each Tuesday and Friday listing publications released on the day of issue and expected releases on the following five days (Canberra Office) or two days (State Offices).

2. Significant occurrences in ABS Publishing are highlighted in the section Publishing News which follows the list of publications issued during the month. Publishing News contains brief descriptions of the contents of new publications, describes changes in ABS publications and shows other information of interest to users of ABS publications.

Publication prices

3. Two prices are shown for each priced publication. The first price given is the 'over the counter' price while the second includes packaging and postage at ordinary rates within Australia. Overseas clients should add 10 per cent of the second price to meet the cost of overseas surface postage. Airmail rates are available on request.

4. Where no price is shown the publication is free.

Mailing list service

5. Clients who wish to receive free or priced publications on a regular basis may use the ABS computerised Publications Mailing List (PML) Service. Further details and order forms are available from any ABS office.

6. Clients (or subscribers) who already use the PML Service and who wish to amend their requirements should quote their account number when contacting ABS. The account number is shown at the top left hand corner of the address label used to despatch publications to clients.

7. Renewal notices are sent to all subscribers annually in respect of the subscription year commencing on 1 January. Payment for priced publications is required in advance and should accompany renewal notices returned to ABS.

Statistical information service

8. Each ABS office has an Information Service to assist clients. The service is designed to answer inquiries from clients on available official statistics, including statistics not published for economic reasons. Unpublished statistics cover a variety of topics such as population, dwellings, building, imports, exports, shipping, etc., in the form of computer printout, microfiche, magnetic tape or specially prepared tables.

9. In cases where a considerable volume of data has to be specially extracted or where a regular statistical service is required, a charge may be made.

Other Publishing News

Children In Care Australia, 1983-84 (4410.0), released on 25 June, was previously titled Persons Under Guardianship and Children in Substitute Care (4405.0). This is the first issue under the new title and it begins an expanded series of publications based on new standardised definitions and data classifications. No statistics on this topic were published in respect of 1982-83 as some States and Territories were unable to implement the new standards in the time available.

Quarterly Indexes of Manufacturing Production, Australia, March Quarter 1985 (5219.0), released on 24 June, announced that the original series in this issue have shown less fluctuation about the December quarter 1984 than was expected from the patterns in previous years. To minimise the extent of subsequent revisions to the seasonally adjusted estimates, a seasonal re-analysis was undertaken on data up to and including the March quarter 1985. This publication also included, for the first time, a smoothed version of the seasonally adjusted index of total manufacturing production, which has been introduced to provide an indication of underlying trends.

Average Weekly Earnings, States and Australia, March Quarter 1985 (6302.0) released on 24 June, contained a note warning that the average weekly earnings could be affected by changes to the composition of the labour force, such as variations in employment levels, occupation distribution and proportions of part-time, casual and junior employees. Further details are available in paragraph 13 of the Explanatory Notes. It should be noted that estimates of average earnings released in ABS publications other than 6301.0 and 6304.0 are not directly comparable with those released in this publication.

Production Bulletin No. 2 : Clothing and Footwear, Australia, March 1985 (8358.0), released on 19 June, noted that the commodity classification used to compile production statistics for clothing has been redesigned. The revisions became effective in July 1984. The objective of the redesign was to develop a classification which would more closely reflect current production characteristics, and facilitate the use of production figures in conjunction with import and export statistics. For the majority of items it has been possible to reformat details for periods prior to July 1984, and present them in terms of the redesigned classification. Factors affecting the comparability of the reformatted series have been identified in footnotes to the statistical tables.
